Improving the quality, safety and experience of care for patients

## EMPOWERMENT

Strengthening general practice capacity and capability

## SUCCESS

Gaining the best outcomes from the resources available

## WELLBEING

Improving the health and equity of our enrolled population

## INTEGRATED CARE COLLABORATIVE

# Collaborating to improve health outcomes

Health pathways are being developed by GPs and specialists to support evidence based care and a seamless health system.

## HEALTH PATHWAYS

There are more health pathways available and GPs are using them more and more.

**32,526** views since May 2014

## SHARED CARE RECORD

The Shared Care Record provides joined up care for patients. Since June 2014 it has been accessed:

**26,992** times by hospital clinicians

**9,346** times by primary care clinicians

**1,256** times by Wairarapa pharmacists

People need to know that taking part in this shared system has real benefits in terms of their care and will provide doctors and nurses with better information in settings where patients haven't planned on presenting, such as emergency departments.
